```java
1   /**
2   This is the implementation of the remote interface "Adder" on the server.
3   */
4
5   import java.rmi.*;
6   import java.rmi.server.UnicastRemoteObject;
7
8   public class Addimp extends UnicastRemoteObject implements Adder{
9       public Addimp()throws RemoteException{
10          super();
11              }
12
13      @Override public int add(int x, int y){return x+y;}
14      @Override public int sub(int x, int y){return x-y;}
15      @Override public float div(int x, int y){return (float)x/y;}
16      @Override public int mul(int x, int y){return x*y;}
17  }
```
